http://www.joncoulter.design

Web designer with a passion for building highly usable and great looking websites with the latest technology. I work on a small team and have a lot of experience designing, building, and managing websites for products. Because of the complexity and variety of websites I've worked on I have experience in both PHP and ASP.NET on the back end and my expertise is CSS3/SASS, JS/jQuery, and HTML5 on the front end.

Skills

- HTML 5
- Responsive Web Design
- Adobe Creative Suite
- Advanced CSS
- User Experience
- User Interface Design
- jQuery
- Graphic Design
- Front-end Development
